

Jackson Bialecki

Seeking a Spring 2027 Software Engineering Co-op

Cincinnati, OH | (614) 822-9548 | bialecjr@mail.uc.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Cincinnati, Cincinnati, Ohio

May 2029

Bachelor of Science in Computer Science, 5-Year Co-op Program

GPA: 3.44/4.00

- Data Structures, Intro to Computer Systems, Information Security & Assurance, Discrete Structures

EXPERIENCE

Computer Science Engineer Intern

May 2026 – Present

Voyage Foods

Mason, OH

- Built and expanded a production manufacturing dashboard integrating Cin7 Core ERP, SafetyChain QA, Ignition SCADA, and PostgreSQL data into one centralized React interface
- Migrated PLC tag storage from **SQLite to PostgreSQL** and visualized **200+ Ignition tags** across **10+ production machines** for analysis, graphing, and plant floor performance monitoring

Full Stack Developer Co-op

August 2025 – December 2025

London Computer Systems

Cincinnati, OH

- Resolved **30+ production tickets** involving bug fixes, feature enhancements, and database updates across Angular front ends, C#/.NET APIs, and SQL-backed systems
- Collaborated with a **50+ engineer team** through code reviews, sprint planning, peer debugging, and production issue investigation in an Agile development environment

Full Stack Developer

May 2023 – June 2025

JAKAPA

Remote

- Built a full-stack Edlink API integration linking JAKAPA's **Angular** platform to Canvas LMS, enabling automated student enrollment, single sign-on, and one-click access to assigned activities
- Engineered **Node.js** backend services and scheduled **cron jobs** to sync rostering and assignment data into **PostgreSQL**, keeping student records consistent between Canvas and JAKAPA

Database Administrator

August 2023 – October 2024

American Equity Funding, Inc.

Remote

- Managed investor and financial data across multiple databases while maintaining data integrity, security, and reporting accuracy
- Migrated legacy **Microsoft Access to PostgreSQL** and built Java tools that allowed non-technical staff to safely query and update records

PROJECTS

8-Bit Programmable Computer | *Digital Logic, EEPROMs, Assembly*

- Designed and assembled a programmable **8-bit computer** from logic gates and breadboard components, including an ALU, registers, RAM, clock, control logic, and a **custom instruction set** supporting arithmetic, memory, and jump operations

Self-Hosted Short-Form Media Archiver | *Python, FastAPI, React, TypeScript, SQLite, Docker* | [GitHub](#)

- Built a Dockerized, self-hosted short-form media archive supporting **11,000+ saved media items** with resumable concurrent downloads, SQLite indexing, FastAPI range streaming, and a virtualized React interface

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, Java, SQL, C/C++, HTML/CSS

Frameworks: React, Next.js, Angular, Node.js, .NET, Flask

Data & Infrastructure: PostgreSQL, SQLite, Docker, Kubernetes, Git, CI/CD, Google Cloud Platform

Industrial Systems: Ignition SCADA, OPC-UA, Siemens S7 PLCs, Cin7 Core ERP, SafetyChain QA, Limble CMMS

AI-Assisted Development: Claude Code, OpenAI Codex, Model Context Protocol (MCP) server development, custom Claude Code skills, agentic workflows
